

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WEST BENGAL

Paper Code : PECAI501A/PECAIDS501B/PECAIML 501A Cloud Computing

UPID : 005932

Time Allotted : 3 Hours

Full Marks : 70

The Figures in the margin indicate full marks.

Candidate are required to give their answers in their own words as far as practicable

Group-A (Very Short Answer Type Question)

1. Answer any ten of the following :

[1 x 10 = 10]

- (I) How many types of tenant are there in cloud computing?
- (II) What is the full form of BPEL?
- (III) What is the updated version of Grid computing?
- (IV) Which is a more sophisticated load balancer?
- (V) What is cloud vendor?
- (VI) Which model is defined to access IaaS, PaaS and SaaS services?
- (VII) Which technology is used to distribute service requests to resources?
- (VIII) Which product migrate files from one datastore to another datastore?
- (IX) What is the full form CSA?
- (X) What is SOAP in cloud computing protocol?
- (XI) What is the purpose of cloud cube model in cloud computing?
- (XII) Which software can be used to implement load balancing?

Group-B (Short Answer Type Question)

Answer any three of the following :

[5 x 3 = 15]

2. Explain briefly the various aspects for the need of Virtualization in Cloud computing. [5]
3. What is the role of an audit in cloud computing? [5]
4. What are differences among IaaS, PaaS and SaaS? [5]
5. Compare and contrast Software virtualization and Network virtualization. [5]
6. Define Deep Web and Dark Web with suitable example. [5]

Group-C (Long Answer Type Question)

Answer any three of the following :

[15 x 3 = 45]

7. (a) What are benefits of Cloud security? [8]
- (b) What is CSA model? Explain with a suitable diagram. [7]
8. (a) When do businesses require cloud bursting? [8]
- (b) What is Cloud bursting architecture? How does Cloud bursting work? [7]
9. (a) Explain different types of Virtualization techniques with diagram [9]
- (b) Briefly describe Amazon Machine Image. [3]
- (c) Explain Para Virtualization and Full Virtualization. [3]
10. (a) What is the meaning of cloud security audit? [5]
- (b) How do several service models provide the security? Mention the three different cloud providers of these three services. [5]
- (c) How is a cloud security audit conducted? [5]
11. (a) What are the components are used in SOA? [8]
- (b) What are comparisons among Public, Private, Hybrid and Community models in cloud computing? [7]
